

Hosted by

Supporting organisation

Dear ICT Colleague,

With critical information infrastructures, data and personal information, children and even freedom of ex-pression on the internet coming under threat from various quarters, resilient and robust Cyber security frameworks are increasingly becoming important to Governments, businesses and individuals.

The Commonwealth Telecommunications Organisation (CTO) has been privy to the growing needs of developing countries to meet the challenges of Cyber Threats. In line with its mandate to promote information and communications technologies in the socio-economic development of developing countries in the Commonwealth, the CTO is organising a **Cyber Security Forum 2010** on the **17th and 18th of June 2010** in **London, UK**. Hosted by the **Department for Business, Innovation and Skills (BIS)**, UK and **The UK Office for Cyber Security**, the conference is **FREE** to attendees from Not-for-Profit/Public sector organisations.

The CTO would like to welcome Cyber Security evangelists to speak at the conference. If you, or someone you know, is interested in speaking at the conference, please send an e-mail to [s.fletcher@cto.int](mailto:s.fletcher@cto.int) or [l.dealwis@cto.int](mailto:l.dealwis@cto.int) today with the title of your presentation and four key bullet points for review and possible inclusion in the conference agenda. A brief biographical description of your speaking experience would also be appreciated.

For further information please visit the [event website](#), or download the brochure [here](#).

We look forward to hearing from you.

**Yours,**

**Samuel Fletcher**

Manager | International Events & Corporate Communications

## KEY TOPICS

- The State under threat
- Individuals and children under threat
- Appropriate legal frameworks for Cybersecurity
- Cybersecurity through International cooperation
- Organisational structures for effective Cybersecurity
- Technical responses to Cybersecurity

## CONFERENCE OBJECTIVES

The conference is aimed at:

- Creating awareness of the many facets of Cyber Threats and the need for robust Cyber Security frameworks
- Building capacity of the key decision makers to implement strategies aimed at preventing and responding to Cyber Threats
- Providing key decision makers with the means to adopt resilient technical measures, establish appropriate organisational structures and create robust legal/regulatory frameworks
- Promoting international co-operation in Cyber Security
- Facilitating partnerships between the different players in Cyber Security to facilitate the flow of information, expertise and resources

## ATTENDEES

### Public Sector

- Ministries in charge of Telecoms/ICTs, Justice, Commerce, Finance
- Regulatory agencies in ICTs,
- Domain name registration agencies
- CERTs
- Attorney General's Departments/State Law Officers
- Other public sector institutions in relevant fields such as child protection, women, commerce, intellectual property rights

### Private Sector

- Fixed line and mobile operators
- ISPs & ASPs
- Law firms
- Content providers
- Technology providers
- Hardware and software vendors
- Equipment vendors

### Civil society

NGOs working in relevant fields such as child protection, women, freedom of information, intellectual property rights, etc.
