Overview:

World's largest B2B media house, Telecom Tiger, is organizing India LTE Summit 2015, offering an able discussion platform aimed at uninterrupted growth and proliferation of 4G services in India. Prime objective of the Summit is to create an effective platform for India's ICT industry and the government to come together and explore the growth opportunities in the area of LTE/4G services in India. The event shall also focus on the most critical challenges being faced by the operators and other players of the ecosystem in faster deployment of 4G network across India. The Summit is supported by CMAI, the only integrated professional registered Association in India for ICT, Education, Cyber security, Communications, Multimedia, Manufacturing Industries and Infrastructure Sector.

Broadly, the Summit will cover the following areas:

- Enablement of multi-sided business model for telcos to monetize data.
- Device's Strategy and Readiness of Ecosystem
- Harmonization of LTE bands-TDD & FDD convergence, its significance in broadband proliferation for India
- Growing importance of 1800 MHz for LTE
- LTE Global best practices relevant to India

Sessions of the Summit:

- Session I: Enablement of multi-sided business model for telcos to monetize data.
- Session II: Device's Strategy and Readiness of Ecosystem.
- Session III: Harmonization of LTE bands-TDD & FDD convergence, its significance for broadband proliferation for India.

Who should attend?

- Ministry of Communications & IT, Government of India
- Telecom Operators
- LTE infrastructure providers
- Content and application developers
- System integrators
- Internet and social media companies
- Next Gen network and technology developers
- Academia
- LTE device manufacturers

- LTE equipment manufacturers

Registration is on first- come- first served basis.

Benefits of attending:

- Networking opportunity with wide range of players in the LTE/4G ecosystem
- In-depth focused sessions
- To learn about the current situation of 4G LTE in India and the globe
- Key platform to discuss growth opportunities and maximizing the monetizing potential of 4G/LTE
- Opportunity to raise issues and challenges, as well as learn from top notch industry leaders and innovators in the 4G domain
- Ideal platform to create branding and communication avenues
